

Green Asparagus plants

A new plantation for asparagus is an investment for many years. The choice for the Kemp's asparagus plants is a conscious choice for guaranteed quality and health.

Our asparagus plants only grow on lots that are in optimal condition. Our asparagus plants are freshly lifted, strictly sorted by crown size, weight and healthy root system in grades A70+ or A40-70, and then delivered to you chilled. What variety is best for you? Call or mail our sales staff.

Gijnlim

- Early variety, the standard and reference for all other varieties
- Suitable for growing in Northern Europe
- High yields, also suitable for green asparagus
- Good straight spear quality
- Excellent closed tips
- Suitable to grow under cover and in mini tunnels
- Ideal for farm gate sales Irrigate sufficiently during drought in the vegetative stage

Aspalim

- Very early, similar to Gijnlim
- Suitable for growing in Northern Europe
- Good spear thickness, thicker and more uniform than Gijnlim
- Good straight, smooth spears
- Excellent closed tips, better than Gijnlim
- Suitable for forcing

Xenolim

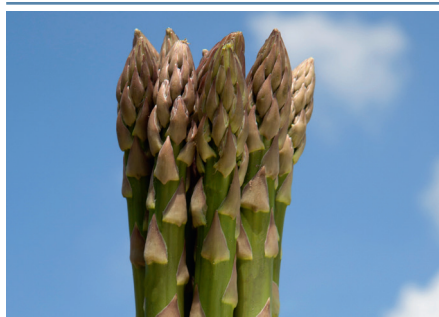

- Medium early variety, free of anthocyanin
- Suitable for growing in North-Western Europe
- Excellent spear thickness with better closed tips than Bacchus
- High production
- At lower temperatures, the spears are slightly lighter in colour
- Long and profitable production life
- Stable foliage
- Susceptible to Stemphylium

Backlim

Backlim is a late and reliable variety

- Suitable for growing in Northern Europe
- Good uniform grades
- Quality increasing in the course of the years
- Very suitable for replanting
- Very robust variety with a long production life
- When overfertilised, higher risk of quality issues

Portlim

- Medium late variety, 5 to 7 days after Gijnlim
- Suitable for growing in North-Western Europe
- Excellent closed tips, better than Gijnlim and Backlim
- High production if the harvest period is long enough
- Suitable for replanting
- Very robust foliage
- Low susceptibility to diseases
