

Assortment white Asparagus plants

A new plantation for asparagus is an investment for many years. The choice for the Kemp's asparagus plants is a conscious choice for guaranteed quality and health. Our asparagus plants only grow on lots that are in optimal condition. Our asparagus plants are freshly lifted, strictly sorted by crown size, weight and healthy root system in grades A70+ or A40-70, and then delivered to you chilled. What variety is best for you?

Prius

- Very early, 4 to 5 days before Gijnlim and Cumulus
- High yields, of which large part in the first harvesting stage
- Good spear thickness, less uniform than Cumulus but 10% thicker than Gijnlim
- Firmly closed tips
- Suitable for cultivation in (mini) tunnels as well as with plastic mulch
- Resistant to rust, stable foliage
- Susceptible to fungal diseases

Vitalim

- Early variety, 4 to 5 days earlier than Gijnlim
- Suitable for growing in Central and Southern Europe
- High early yield, of which large part in the first harvesting stage
- Thick spears
- Firmly closed tips
- Spear quality can differ when the temperature changes
- Suitable for forcing methods under cover or in (mini) tunnels
- Stable long production life, vital grower

Gijnlim

- Early variety, the standard and reference for all other varieties
- Suitable for growing in Northern Europe
- High yields, also suitable for green asparagus
- Good straight spear quality
- Excellent closed tips
- Suitable to grow under cover and in mini tunnels
- Ideal for farm gate sales Irrigate sufficiently during drought in the vegetative stage

Cumulus

- Early variety
- Suitable for growing in Northern Europe
- Very nice white spears
- Excellent grades
- Good flavour, won several taste competitions
- Suitable to grow under cover or in mini tunnels
- Crop can be sensitive to wind and breakage
- Lower nitrogen requirements

Ramires

- Early variety, 1 to 2 days later than Gijnlim
- Suitable for growing in Northern, Central and Southern Europe
- Yield similar to Gijnlim, but with more uniform spear thickness
- Good flavour
- Suitable for cultivation under cover and forcing in mini tunnels
- Suitable for replanting
- Green and healthy foliage
- Long, profitable production life, disease resistant

Cygnus

- Medium early variety, slightly earlier than Herkolim
- Suitable for growing in Central and Northern Europe
- High yields with uniform grades
- Firmly closed tips
- Suitable to grow under cover
- Very suitable for high plant densities
- Robust healthy foliage and low susceptibility to fungal diseases

Quality is our passion!

Grolim

Medium early variety

- Suitable for growing in Northern and Central Europe
- High yields
- Firm spear thickness
- Firmly closed tips
- High yield performance
- Suitable for forcing and extending
- Robust, disease-resistant foliage

Maxlim

- Medium early variety, suitable Central and Southern Europe
- High yields, similar to Grolim
- Nice white asparagus
- Tip closure and spear quality similar to Grolim but with more uniform grades.
- Good flavour
- Less susceptible to hollow spears than Grolim
- Strong and stable foliage

Maralim

- Very tasty, mid-early, high-quality variety with perfectly closed tips
- 100% male hybrid, suitable for Northwest Europe
- High production potential; Very good quality grades
- Perfect tip closure, allowing harvesting rhythms to be adapted.
- Suitable for mini tunnels and open cultivation
- High resistance to breakage, hollowing, pink discolouration, and rust

Sirius

- MA 100% male, very white asparagus
- Late variety with high yield
- Thick stems with perfectly closed heads of excellent quality and good flavour
- Strong against rust, hollow stems and purple discolouration

Backlim

Backlim is a late and reliable variety

- Suitable for growing in Northern Europe
- Good uniform grades
- The standard variety in heated cultivation, early because of a good response to heat
- Quality increasing in the course of the years
- Very suitable for replanting
- Very robust variety with a long production life
- When overfertilised, higher risk of quality issues

Raffaello

- Medium late variety
- High yields, up to 20% higher than Backlim
- Firmly closed tips
- An excellent performer at higher temperatures
- Excellent spear thickness, quality similar to Grolim
- Long production life
- Suitable for extended cultivation
- Robust foliage and disease resistant

Quality is our passion!
